OraSoothe consists entirely of food ingredients, with no artificial ingredients, which makes it unique on the marketplace. OraSoothe contains polysaccharides (beta-linked, acetylated mannans and xylitol) and a tiny amount of essential oils (eugenol, oil of thyme and methyl salicylate). All ingredients are at concentrations that never exceed, and are generally far below those of the food sources. The proprietary way OraSoothe is compounded and manufactured is as important to its efficacy as are the ingredients themselves.
